'Perfect Fit' is the most attractive and innovative window blind available on the market today. The system is unique because the window blind fits neatly into a stylish frame, which moves together with the windows and doors when they are opened and closed giving you the perfect combination of shade and ventilation.

The 'Perfect Fit' system enables window blinds to be fitted perfectly onto most double glazed windows & doors, with no holes drilled into your UPVC frame! The blind will fit neatly onto the window and enhances your privacy because there are no gaps down the side of the blind.

One of the unique features of the **Perfect Fit** frame is its outstanding thermal efficiency. The frame fits flush against your window to help reduce heat build up in summer and retain heat in winter. In turn keeping your cooling & heating bills to a minimum.

**Made to measure** – each individual blind will have been pre assembled with its frame before the installation time, ensuring not only a short & clean fitting appointment, but the reassurance that the blinds will have been tested, and in working order before they are in place.

**Style** – the beauty of the **perfect blind** is that no matter which type of blind you decide to have, pleated, venetian or roller, you can guarantee the finished result will be your chosen style and extremely functional.

**Performance** – choice of blind type without any visual gaps. Installation without any drilling or screwing into the UPVC frames. The ideal choice for safety with no loose cords or loops.

**Energy Saving** – 'Perfect Fit' is the No1 product for solar protection and insulation. Add a fabric with a **Solar Protective Coating**, or a **Solar Pearlescent Fabric** from the roller or pleated blind range and you will have the ultimate blind for solar heat control and added privacy & security.

A development of the 'Perfect Fit' blind is the revolutionary roof version - the '**Perfect Fit International**'. Our range of 20mm pleated blind fabric is well suited for this product, and has a wide range of colours and textures to choose from. These can be tailored to fit even the most awkward shaped windows.

The '**Perfect Fit International**' system now means a complete conservatory, including skylight, shaped, hopper, tilt & turn and standard windows, plus doors can be fitted without the use of screws.
